Summary

Summary volume: minimum 300 words, maximum 350 words. The following summary structure is compulsory: **Purpose, Methods, Results and Conclusions.**

Key words

After the summary it is necessary to add **5-10 key words or phrases**, none of which duplicates the title of the article.

JEL Classification: H11, D73.

1. Introduction

2. Literature review

Many researchers have considered the issues of theory and implementation of international customs law's standards in their publications, thus the analysis of existing developments in the sphere of scientific research indicates the diversity of views upon their understanding. The generalization of published scientific papers allows us to combine the existing diversity of views in understanding the standards of international customs law within the framework of two approaches: scientific and practical (Baimuratov, 2006).

3. The doctrine of international customs law

4. Empirical results

5. Conclusions
