Rules of link on references and bibliographic description design:

References are given in the text only in parentheses according to the example:

Many researchers have considered the issues of theory and implementation of international customs law's standards in their publications, thus the analysis of existing developments in the sphere of scientific research indicates the diversity of views upon their understanding. The generalization of published scientific papers allows us to combine the existing diversity of views in understanding the standards of international customs law within the framework of two approaches: scientific and practical (Baimuratov, 2006).

Prohibition to refer to the aggressor state's scholarly papers:

It is prohibited citing and including in the reference list russian-language contributions published in any country, incl. papers written in other languages but published in russia and belarus.
